Maintenance Guide

Introduction

If you're reading this, that means you're the lucky owner of a NeCo Little Paws™ 2.0 clonal toy. And to that, we say...

...Congratulations!

We hope your NeCo Little Paws™ 2.0 clonal toy comes to be your best friend and a loving member of your family!

With a member of the NeCo Little Paws™ 2.0 collection, you'll receive a welcome package containing:

- 3x NeCo Little Paws™ 2.0 1kg Nutrient Powder (Strawberry, Banana, Chocolate)
- 1x NeCo Little Paws™ 2.0 Collar and Leash set (color depending on chosen design)
- 1x NeCo Little Paws™ 2.0 Nutrient Powder Preparation Kit
- 1x NeCo Little Paws™ 2.0 Sleepytime Solution™ 500g Bottle with Applicator
- A coupon for 15% off your next purchase from NeCo Genetics!

Setting Up

So, you've brought your NeCo Little Paws™ 2.0 home. What next? We're glad you asked! In just two easy steps, your new friend will be ready to go!

Unboxing

(We recommend unboxing your NeCo Little Paws™ 2.0 clonal toy within 12 hours of purchase. This prevents Sleepytime Solution™ administered for ease of transport from wearing off, which would make unboxing much more difficult)

After removing the external cardboard packaging, you'll find a plastic case containing your brand new family member, submerged in NeCo's patented Clone Support Solution*. While we recommend draining some of this fluid before opening the case, do not remove all of it- this could make your friend very sick!

**NeCo Genetics Clone Support Solution™ is not edible, even if it smells delicious! If any gets on your skin or eyes, rinse immediately and seek medical advice.*

Activation

Gently dry your NeCo Little Paws™ 2.0 clonal toy with a towel. Once they're no longer submerged in NeCo Genetics Clone Support Solution™, the Sleepytime Solution™ they'd been administered through it will begin to wear off, and it won't be long until they're up and moving!

**Clonal toys may be agitated or disoriented upon activation. Keep the room you awaken your new friend in quiet, and avoid sudden movements within the first hour of awakening. NeCo Genetics are not responsible for bodily harm or death caused by clonal products if this advice is not taken.*

Feeding

While NeCo Little Paws™ 2.0 clonal toys are both non-toxic and immune to all toxins and can be fed practically anything, we recommend official NeCo Nutrition Powder for a healthy, happy clone!

You'll receive a Nutrient Powder Preparation Kit with your purchase, containing a measuring scoop, bowl, and stirrer. Making a tasty meal for your pet is as simple as 123!

Step One:

Measure one scoop of Nutrition Powder, and pour it into the bowl.

Step Two:

Add 4 tablespoons of clean water.

Step Three:

Stir until a paste forms. More water may be added if the paste is still too dry. If the paste is too wet, add cornflour. Do not add additional paste to adjust consistency.

Step Four:

Bon appetit! Serve the bowl to your NeCo Little Paws™ 2.0 clonal toy.

One scoop of NeCo Little Paws™ 2.0 Nutrient Powder should provide enough nutrition for your clonal toy. NeCo Genetics do not recommend overfeeding.

Cleaning

△ NeCo Little Paws™ 2.0 clonal toys are not machine washable.

- If your pet gets dirty, we recommend wiping it down with a soft, damp cloth.
- In extreme cases, you may fully submerge a NeCo Little Paws™ 2.0 clonal toy in warm water for up to 2 hours.
- We recommend using a non-perfumed soap to clean your clonal toy.

Do not machine wash your NeCo Little Paws™ 2.0 product.

Safety

While the NeCo Little Paws™ 2.0 collection is more friendly and docile than ever, it's important not to forget the inherent risks that come with a clonal toy. Since NeCo Genetics is not responsible for any bodily harm caused by our products given that we have informed you of the risks, it's a good idea to keep the following ground rules in mind!

1. Do not unnecessarily touch your NeCo Little Paws™ 2.0 clonal toy's mouth.
2. Avoid startling your NeCo Little Paws™ 2.0 clonal toy.
3. Discourage play fighting.
4. Do not let children play with a NeCo Little Paws™ 2.0 clonal toy without adult supervision.

In the case of your NeCo Little Paws™ 2.0 clonal toy becoming unusually aggressive, just remember **S.A.F.E!**

Sound- Distract your unruly buddy with a loud noise elsewhere in the room!

Amuse- Offer them a toy to play with to take their mind off the anger.

Feed- Offer a protein-rich food i.e Beef NeCo Little Paws™ 2.0 Nutrient Powder.

End- In emergencies, apply Sleepytime Solution until your pet loses consciousness.

Once again, we remind you that NeCo Genetics are not responsible for injuries caused by improper handling of our products. Overuse of Sleepytime Solution is not recommended.

Repairs And Returns

NeCo products are as lifelike as can be... but this can mean they can get sick like real animals can, too. It's good to be able to recognise when your friend isn't feeling well!

Some things to look out for are:

- Lethargy.
- Excessive aggression.
- Noisy breathing
- Convulsions.
- Refusal to eat.
- Leaking.
- Complete lack of movement or breathing.

If you notice that there's something wrong with your NeCo Little Paws™ 2.0 clonal toy, take it into a workshop for a checkup! We'll try to fix what's wrong, but if we can't, you'll receive a replacement or refund as long as you're still within the 2 year warranty period!

That's all from us! We hope you have a wonderful time with your brand new NeCo Little Paws™ 2.0 clonal toy.
